

Module Type 4 Channels Temperature Controller User Manual (GTAX 4 Channels) (Applied to GTAX B Version)

Features:

- Multiple TC signal types for option, with DC 300V isolation between signal inputs, able to connect grounding probe
- With many functions, measured display, control output, RS485 communication, etc.
- Optional many types of PID arithmetic, and with auto-tuning function.
- Using for industrial machinery, machine tools, measuring instruments.
- With limiting target value setting function

National High-tech Enterprise/ National Standard Drafting Unit

Hotline: 400-0760-168

Version code: KKG TAX-4L-B01E-A/0-20250305

The instruction explain GTAX series instrument settings, connections, name and etc, please read carefully before you use the temperature controller. Please keep it properly for necessary reference.

I. Safe Caution

Warning

- When the failure or abnormal of products lead to a system of major accidents, please set the proper protection circuit in the external.
- Please don't plug in before completing all the wire. Otherwise it may lead to electric shock, fire, fault.
- Not allow to use outside the scope of product specification, otherwise it may lead to fire, fault.
- Not allow to use in the place where is inflammable and explosive gas.
- Do not touch power terminal and other high voltage part when the power on, otherwise you may get an electric-shock.
- Do not remove, repair and modify this product, otherwise it may lead to electric shock, fire, fault.

Caution

- The product should not be used in a nuclear facility and human life associated medical equipment.
- The product may occur radio interference when it used at home. You should take adequate countermeasures.
- The product get an electric shock protection through reinforced Insulation. When the product is embedded in the devices and wiring, please subject to the specification of embedded devices.
- In order to prevent surge occurs, when using this product in the place of over 30m indoor wiring and wiring in outdoor, you need to set the proper surge suppression circuitry.
- The product is produced based on mounting on the disk. In order to avoid to touch the wire connectors, please take the necessary measures on the product.
- Be sure to observe the precautions in this manual, otherwise there is a risk of a major injury or accident.
- When wiring, please observe the local regulation.
- To prevent to damage the machine and prevent to machine failure, the product is connected with power lines or large capacity input and output lines and other methods please install proper capacity fuse or other methods of protection circuit.
- Please don't put metal and wire clastic mixed with this product, otherwise it may lead to electric shock, fire, fault.
- Please tighten screw torque according to the rules. If not, it may lead to electric shock and fire.
- In order not to interfere with this products to dissipate heat, please don't plug casing around the cooling vent hole and equipment.
- Please don't connect any unused terminal.
- Please do the cleaning after power off, and use the dry cleaning cloth to wipe away the dirt. Please don't use desiccant, otherwise, it may casue the deformation or discoloration of the product.
- Please don't knock or rub the panel with rigid thing.
- The readers of this manual should have basic knowledge of electrical, control, computer and communications.
- The illustrations, data examples and picture examples used in this manual are recorded for the convenience of understanding the manual, and are not guaranteed to be the results of the operation.
- In order to use this product with safety for long-term, regular maintenance is necessary. The life of some parts of the equipments are by some restrictions, but the performance of some will change for using many years.
- Without prior notice, the contents of this manual may will be change. We hope these is no any loopholes, if you have questions or objections, please contact us.

Caution of Install & Connection

- Installation
 - This product is used in the following environmental standards. (IEC61010-1) [Overvoltage category II class of pollution 2].
 - This product is used in the following scope: environment, temperature, humidity and environmental conditions. Temperature: 0~50 C; humidity: 45~85%RH; Environment condition: Indoor warranty. The altitude is less than 2000m.

3) Please avoid using in the following places:

The place will be dew for changing temperature; with corrosive gases and flammable gas; with vibration and impact; with water, oil, chemicals, smoke and steam facilities with Dust, salt, metal powder; and with clutter interference, static electric and magnetic fields, noise; where has air conditioning or heating of air blowing directly to the site; where will be illuminated directly by sunlight; where accumulation of heat will happen caused by radiation.

4) On the occasion of the installation, please consider the following before installation.

In order to protect heat saturated, please ensure adequate ventilation space.

Please consider connections and environment, and ensure that the products below for more than 50mm space. Please avoid to installed over the machine of the calorific value (Such as heaters, transformer, semiconductor operations, the bulk resistance). When the surrounding is more than 50°C, please using the force fan or cooling fans. But don't let cold air blowing directly to the product. In order to improve the anti-interference performance and security, please try to stay away from high pressure machines, power machines to install.

Don't install on the same plate with high pressure machine and the product.

The distance should be more than 200mm between the product and power line. The power machine shall be installed at a distance as far as possible.

2) Cable caution:

1) Please use specified compensation wire in the place of TC input; Please use insulated TC if the measured device is heated metal.

2) Please use the cable of lesser resistance in the place of RTD input, and the cable (3 wire) must be no resistance difference, but the total length should be within 5m.

3) In order to avoid the effect of noise, please put the input signal away from meter cable, power cable, load cable to wiring.

4) In order to reduce the power cables and the load power cables on the effect of this product, please use noise filter in the place where easy to effect. You must install it on the grounding of the disk if you use the noise filter, and make the wiring to be shortest between noise filter output side and power connectors. Don't install fuse and switch on the wiring of noise filter output side, otherwise it will reduce the effect of noise filter.

5) It takes 5s from input power to output. If there is a place with interlocking actions circuit signal, please use timer relay.

6) Please use twisted pair with a shield for analog output line, can also connect the common-mode coil to the front-end of the signal receiving device to suppress line interference if necessary, to ensure the reliability of signal.

7) Please use twisted pair with a shield for remote RS485 communication cable, and deal with the shield on the host side earth, to ensure the reliability of signal.

8) This product don't have the fuse; please set according to rated voltage 250V, rated current 1A if you need; fuse type: relay fuse.

9) Please use suitable slotted screwdriver and wire.

Terminal distance: 5.0mm. Screwdriver size: 0.6X3.5, length of slotted screwdriver >130mm. Recommended tightening torque: 0.5N.m.

Proper cables: 0.25 ~ 1.65mm single cable/multiple core cable

10) Please don't put the crimp terminal or bare wire part contact with adjacent connector.

II. Model Illustration

GTAX F - S420 - T □ — Industry customization function

III. Model Description

Model	Input	OUT1~OUT4	AU1,AU2 Auxiliary alarm	RS485
GTAX-S428-T	TC	SSR output	Yes	Yes
GTAX-S420-T	TC	SSR output	Yes	NO
GTAX-T428-T	TC	Transistor output	Yes	Yes
GTAX-T420-T	TC	Transistor output	Yes	NO
GTAX-S48-T	TC	SSR output	NO	Yes
GTAX-S40-T	TC	SSR output	NO	NO
GTAX-T48-T	TC	Transistor output	NO	Yes
GTAX-T40-T	TC	Transistor output	NO	NO

IV. Specifications

1. Electrical parameters:

Sample rate	1 times per second per channel
Power supply	AC/DC 100-240V (85-265V), AC/DC 24V power supply (customized, SSR voltage output requires DC 24V power supply)
Power consumption	< 10VA@220V 3W@DC 24V
Environment	Indoor use, Temperature: 0~50°C no condensation, Humidity: < 85%RH, altitude < 2000m
Storage environment	-10 ~ 60°C, no condensation
SSR output	DC 24V pulse level, load < 20mA
Transistor output capacity	@25 °C DC 24V maximum 100mA, current derating 8mA per 10 °C temperature rise, withstand voltage 100V
Communication port	RS485 port, Modbus-RTU protocol
Insulation impedance	Input, output, power cabinet > 20MΩ
ESD	IEC/EN61000-4-2 Contact ±4KV / Air ±8KV perf. Criteria B
Pulse traip anti-interference	IEC/EN61000-4-4 ±2KV perf. CriGTEria B
Surge immunity	IEC/EN61000-4-5 ±2KV perf. CriGTEria B
Voltage drop & short interruption immunity	IEC/EN61000-4-29 0% ~ 70% perf. CriGTEria B
Dielectric strength	Signal input and output and power supply 1500VAC for 1 minute, below 60V between low voltage circuits AC 500V for 1 minute
Total weight	About 400g
Shell material	PA66-FR (Flame Class UL94V-0)
Panel material	PVC film and PEM silicone key
Power-off data protection	10 years, times of writing: 1 million times
Safety Standard	IEC61010-1 Overvoltage category II, pollution level 2, level II (Enhanced insulation)

2. Measurement signal parameter

Input Type	Symbol	Measurement Range	Resolution	Accuracy	Input impedance/Auxiliary current	Commication Code
K	K1	ℎ ℎ	-50 ~ 1200	1°C	0.5%F.S ± 3digits	>1MΩ 0
	K2	ℎ ℎ	-50.0 ~ 999.9	0.2°C	0.5%F.S ± 1°C	>1MΩ 16
J	J1	ℎ ℎ	0 ~ 1200	1°C	0.5%F.S ± 3digits	>1MΩ 1
	J2	ℎ ℎ	0.0 ~ 999.9	0.2°C	0.5%F.S ± 1°C	>1MΩ 17

Input Type	Symbol	Measurement Range	Resolution	Accuracy	Input impedance/Auxiliary current	Communication Code
E	E1	0 ~ 850	1°C	0.5%F.S±3digits	>1MΩ	2
	E2	0.0 ~ 850.0	0.3°C	0.5%F.S±1°C	>1MΩ	18
T	T1	-50 ~ 400	1°C	0.5%F.S±3°C	>1MΩ	3
	T2	-50.0 ~ 400.0	0.4°C	0.5%F.S±3°C	>1MΩ	19
B	b	250 ~ 1800	1°C	1%F.S±2°C	>1MΩ	4
R	r	-10 ~ 1700	1°C	1%F.S±2°C	>1MΩ	5
S	s	-10 ~ 1600	1°C	1%F.S±2°C	>1MΩ	6
N	N1	-50 ~ 1200	1°C	0.5%F.S±1°C	>1MΩ	7
	N2	-50.0 ~ 999.9	0.2°C	0.5%F.S±1°C	>1MΩ	20
	0 ~ 50mV	-1999 ~ 9999	12bit	0.5%F.S±3digits	>1MΩ	12

AC/DC 24V power supply isolation diagram

V. Dimensions and Installation method

VI. Connection Diagram

1. Wiring diagram description

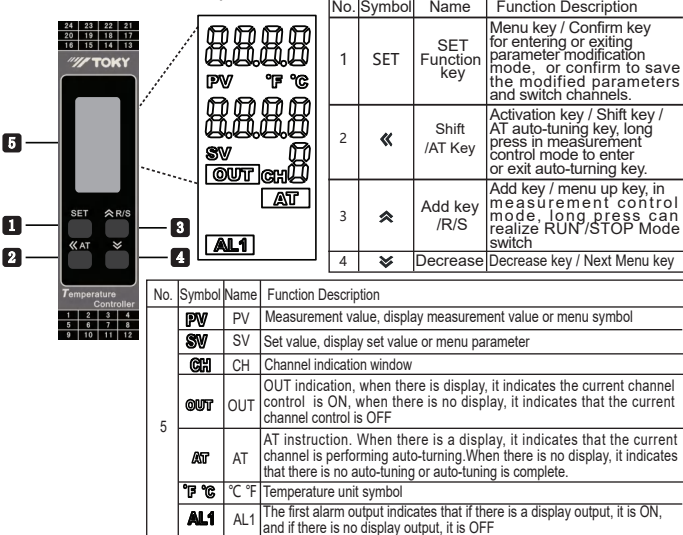

2. Examples of partial wiring diagram

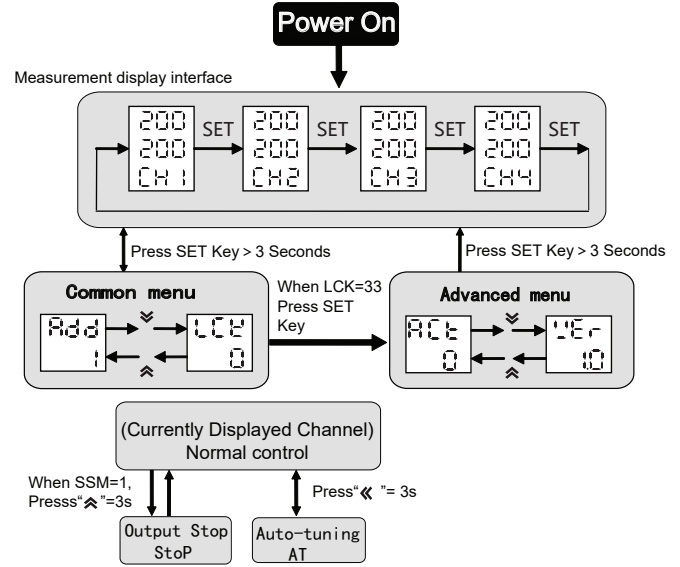

RS485 communication wiring diagram description
In case of any change, please subject to the wiring diagram on the actual product.

VII. Name of universal panel

VIII. Operation Process and Menu Illustration

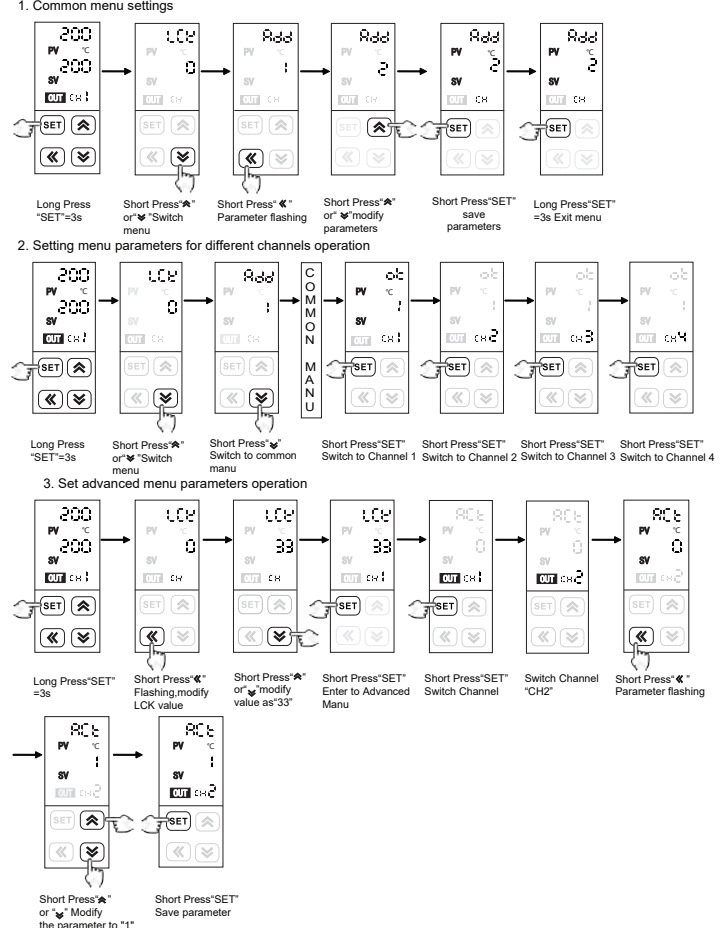

1. Operation process & method

2. Channel switching operation

3. Parameter modification operation

- In normal measurement control mode after power on, press and hold the "SET" key for more than 3 seconds to enter the menu parameter viewing mode, short press "SET" key to switch the display channel, the channel number is displayed in the CH indication window, and the panel display correspond to the channel number;
- In the menu view mode, short press "◀" or "⬆" key check the common menu parameters circularly.
- In the menu view mode, short press the "◀" key to flash the viewed menu parameter value to enter the parameter modification mode, and each short press can move one bit to the left; this cycle.
- In the parameter modification mode, press the "⬆" or "⬇" key once to increase or decrease the flashing data bit by one.
- In the parameter modification mode, shortly press the "SET" key after the parameter is modified to save the modified parameter and long press "SET" exit to the menu view mode.
- In normal measurement control mode, press and hold the "◀" key for more than 3 seconds to enter the PID auto-tuning state corresponding to the channel.
- In the normal measurement control mode, press and hold the "⬆" key for more than 3 seconds to enter or exit the running or stop mode corresponding to the channel; the stop mode SV window displays "STOP".
Note that the SSM should enable panel operation. "STOP" is displayed.

Slave normal response (read multiple registers)						
1	2	3	4	5	6	7
Device Address	Function code	Quantity of data bytes	Data high bit	Data low bit	※CRC code low bit	※CRC code high bit
0x01	0x03	0x02	0x01	0xF4	0xB9	0xD2

Function number abnormal response: (e.g. host request address 0x2510)

Slave abnormal response (read multiple registers)				
1	2	3	4	5
Device Address	Function code	Error code	※CRC code low bit	※CRC code high bit
0x01	0x83	0x02	0xC0	0xF1

2. Write the register

For example: Host writes integer SV1 (SV=200)

The ADD code of SV1 is 0x200C, the register number is 48205, because SV is integer(2 byte), seizes 1 data register. The memory code of decimal integer 200 is 0x00C8

Host request (write multi-register)										
1	2	3	4	5	6	7	8	9	10	11
Meter ADD	Function code	Start ADD High bit	Start ADD Low bit	Data byte Length high bit	Data byte Length low bit	Data byte Length	Data high bit	Data low bit	※CRC code low bit	※CRC code high bit
0x01	0x10	0x20	0x0C	0x00	0x01	0x02	0x00	0xC8	0x86	0xC8

Slave normal answer (write multi-register)							
1	2	3	4	5	6	7	8
Meter ADD	Function code	Start ADD High bit	Start ADD Low bit	Data byte Length high bit	Data byte Length low bit	※CRC code low bit	※CRC code high bit
0x01	0x10	0x20	0x0C	0x00	0x01	0xCA	0xA0

Host write single-register SV (SV= 200)

Host request (write single-register)							
1	2	3	4	5	6	7	8
Meter ADD	Function code	ADD High bit	ADD Low bit	Data high bit	Data low bit	※CRC code low bit	※CRC code high bit
0x01	0x06	0x20	0x0C	0x00	0xC8	0x43	0x9F

Slave normal answer (write single-register)							
1	2	3	4	5	6	7	8
Meter ADD	Function code	ADD High bit	ADD Low bit	Data high bit	Data low bit	※CRC code low bit	※CRC code high bit
0x01	0x06	0x20	0x0C	0x01	0xC8	0x43	0x9F

Data address error response: (For example: Host request the Address index is 0x2510)

Slave abnormal response (write multiple registers)					
1	2	3	5	6	
Device Address	Function code	Error code	※CRC code low bit	※CRC code high bit	
0x01	0x90	0x03	0xC0	0x01	

Parameter address mapping table

No	Address (register number ①)	Parameter name	Parameter Description	Register Quantity	Read Write	Remark
1	0x2000~0x2003(48193~48196)	PV1~PV4	Measure value	1	R

Reserve						
41	0x2500(49473)	ADD	Communication Add	1	R/W	
42	0x2501(49474)	BAD	Communication baud	1	R	
43	0x2502(49475)	PRTY	Check bit selection	1	R	
44	0x2503(49476)	DATC	Data transmission sequence	1	R	③
45	0x2504(49477)	LCK	Password	1	R	
46	0x2505(49478)	NAME	Meter Name	1	R	

Note①: The register number is the address converted to decimal plus 1 and then the register identification code 4 is added in front; for example: the register number of the data address 0x2000 is 8192 + 1 = 8193 and then 4 is added in front, that is, the register number 48193; Related applications can be seen, such as Siemens S7-200 PLC.

Note ②: Channel status indication. When the data bit is 1, it means execution, and when it is 0, it means not executed.

D7	D6	D5	D4	D3	D2	D1	D0
----	HHHH	LLLL	----	----	----	AL1	OUT1

Note③: DATC communication data transmission sequence and response delay description

※ 16-bit CRC check code to get C program

```

unsigned int Get_CRC(uchar *pBuf, uchar num)
{
    unsigned int i;
    unsigned int wCrc = 0xFFFF;
    for(i=0; i<num; i++)
    {
        wCrc ^= (unsigned int)(pBuf[i]);
        for(j=0; j<8; j++)
        {
            if(wCrc & 1){wCrc >>= 1; wCrc ^= 0xA001;}
            else
                wCrc >>= 1;
        }
    }
    return wCrc;
}

```
